MATHEMATICS 9709/11

Paper 1 Pure Mathematics 1

October/November 2021

1 hour 50 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 75.
- The number of marks for each question or part question is shown in brackets [].

The diagram shows part of the graph of $y = a\cos(bx) + c$.

| (a) | Find the values of the positive integers a , b and c . | [3] |
|-----|--|-----|
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

(b) For these values of a, b and c, use the given diagram to determine the number of solutions in the interval $0 \le x \le 2\pi$ for each of the following equations.

$$(i) \ a\cos(bx) + c = \frac{6}{\pi}x$$

(ii)
$$a\cos(bx) + c = 6 - \frac{6}{\pi}x$$
 [1]

The diagram shows a metal plate ABC in which the sides are the straight line AB and the arcs AC and BC. The line AB has length 6 cm. The arc AC is part of a circle with centre B and radius 6 cm, and the arc BC is part of a circle with centre A and radius 6 cm.

| Find the perimeter of the plate, giving your answer in terms of π . | |
